

Austinites for Geographic Representation (AGR)

AGR is a broad-based and growing coalition of neighborhood, political and civic organizations, leaders and activists from across the spectrum; from the NAACP and LULAC to the Republican Party. We have come together to develop a geographic representation plan for Austin city elections that will be done via a citizen's petition drive to place a measure on the ballot. We strongly believe that a simple 10-1 plan (10 single-member districts with the Mayor being elected at-large), combined with a non-partisan independent citizen's redistricting commission, is the way to go.

Let the people draw the maps and let our neighborhoods, not the campaign contributors, run the show!
